

Global Perspectives
Theme of Interaction between Humans and Environment

In groups of 3-4, you will be assigned one of the following environments:

- Rainforest
- Desert
- Cold
- Fertile plain

Your assignment is to find/create the following:

- Definition of your environment
- Picture of your environment
- Advantages and disadvantages of living in your environment
- Your interactions with the environment:
 - 5 ways I need to change the environment in order to live there successfully
 - 5 ways I need to adapt to the environment in order to live there successfully
 - At least 3 negative side effects of the changes you've made (for example, acid rain)

Assignment is worth 50 points and is due at the end of class tomorrow.
